

SNAPPSY THE ALLIGATOR

(Did Not Ask to Be on This Fortune Teller!)

Ok! Here's how to do it! First, cut out the fortune teller square. Then flip it over so the pictures are face down. Fold the four corners toward the center (Snappy meets animals meets the librarian meets ME, the narrator!) to make a smaller square. Flip it over again and fold the four corners to the center again to make an even smaller square. This part is optional, but helps make the last step easier: Fold it in half one way to make a rectangle, then unfold it and fold it in half the other way to make a rectangle again. Then. Deep breath. This is the tricky part. Stick your fingers in the pockets where Snappy, me, the librarian, and the animals are, so our pointy corners meet. Now it's a fortune teller and you're my best friend forever.
